

# Firmware Update Instruction Guide

Update your firmware to get the latest features, amps and effect models

1. Go to [www.fender.com/tonemaster\\_pro](http://www.fender.com/tonemaster_pro) on your computer to download and install the latest firmware.
2. Connect Tone Master Pro to computer via included USB-C cable.

3. Hold down firmware update button for 10 seconds while powering on.

4. Tone Master Pro will display "USB Firmware Update Mode" screen.

5. Drag & drop firmware update file (".img" file) onto "FENDER\_AMP" mounted drive on your computer.

6. Tone Master Pro will display "Applying Updates" screen. Do not power off until update is complete.

7. Tone Master Pro will display "Update Complete" screen once firmware update is complete. Restart Tone Master Pro and enjoy!
